

CONTENTS

NATIONAL WATER-QUALITY ASSESSMENT PROGRAM.....	IV
SUMMARY OF MAJOR FINDINGS	1
Stream and River Highlights	1
Ground-Water Highlights	2
INTRODUCTION TO THE SANTEE RIVER BASIN AND COASTAL DRAINAGES	3
Physiography and Water Quality	3
Land Use and Water Quality.....	3
Climate Conditions and Water Quality.....	4
Water Use.....	4
Flow Regulation, Impoundments, and Surface-Water Quality	5
Aquifer Characteristics and Ground-Water Quality.....	5
MAJOR FINDINGS	6
Pesticides Commonly Were Detected in Santee Basin Streams.....	6
Few Pesticides Were Detected in Drinking-Water Supply Aquifers	7
Pesticides Were Common in Shallow Ground Water in Urban and Agricultural Areas.....	8
Organochlorine Pesticides Were Detected in Bed Sediment and Tissues	8
NATIONAL PERSPECTIVE—Santee Basin Pesticide Findings Were Similar to National Findings.....	9
Phosphorus Concentrations in Streams Frequently Exceeded USEPA Goals	10
Water-Supply Aquifers Rarely Exceeded Drinking-Water Standards for Nitrate.....	11
NATIONAL PERSPECTIVE—Phosphorus Concentrations in the Santee Basin Were in the Middle Range of National Results	13
Bed Sediment Had Low Concentrations of Trace Elements	14
NATIONAL PERSPECTIVE—Mercury Contamination Potential in Santee Basin Was Highest in Nation....	14
Trace Elements Accumulated in Clam Tissue and Fish Livers	15
Radon Exceeded Proposed Standards in Many Wells	16
NATIONAL PERSPECTIVE—Radon Concentrations Were High in the Santee Basin	16
Volatile Organic Compounds Were Common in Urban Ground Water	17
Drinking-Water Aquifers Had Low Concentrations of Volatile Organic Compounds.....	18
Urban and Agricultural Streams Had High Concentrations of Bacteria	19
Biological Communities Reflected Land-Use Differences	20
NATIONAL PERSPECTIVE—Santee Basin Streams were in the Middle of National Biological Rankings..	21
STUDY UNIT DESIGN.....	22
GLOSSARY	24
REFERENCES.....	25
APPENDIX—WATER-QUALITY DATA FROM THE SANTEE RIVER BASIN AND COASTAL DRAINAGES IN A NATIONAL CONTEXT	26
